SUPPLEMENTARY INFORMATION: EPA is making available for comment an options paper on pesticide export notification issues. EPA is considering modifications to its export notification policy. EPA believes that certain modifications are necessary because (1)

EPA's current policy has resulted in too many export notices on pesticides which may be of little or no concern to other governments; (2) the increasing numbers of export notices undermines the effectiveness of the international Prior Informed Consent (PIC) procedures, an international information exchange and chemical management program developed by the Food and Agriculture Organization and the United Nations Environment Programme (UNEP); (3) the costs of implementing the existing program on the U.S. government, other governments, and industry, should be reduced.

A record has been established for this notice of availability under docket number OPP-170004 (including comments and data submitted electronically as described below).
